

Over the Counter Nutritional Supplements

Information for service users and carers

The following items are high calorie/protein drinks which can be purchased over the counter to help improve your nutritional status. Products marked with an asterisk* are the most readily available in large supermarkets and chemists; however others can be found online.

These can be used instead of or in conjunction with homemade high calorie/protein drinks. A usual dose to improve nutritional status would be twice daily unless advised otherwise by your healthcare professional. They also contain a wide range of vitamin and minerals.

Powder based supplements
